Cumulative Editorial Index

for the Year 1965

AUTHORS

Adlaf, William J., Boyar-Schultz Corp.
Shape package to fit product, end packaging line delays ... Feb. 106

Allen, W. V., International Business Machines Corp.
Packaging tests point the way to product design improvement ... July 86

Aust, Walter R., The Norwich Pharmacal Co.
Package display stand assembling takes careful planning and scheduling ... Feb. 71

Barker, Stephen M., Continental Can Co.
Management of packaging ... Feb. 110

Bartley, Douglas L., H. J. Heinz Co.
Standardized tests match workers' skills to job demands ... Dec. 73

Bence, Kurt, J. C. Penney Co., Inc.
Specifications, tests cut shipping damage ... June 102

Berger, Alan, Bayuk Cigars, Inc.
Fresh challenges for packaging director ... Sept. 91

Carroll, J. G., Chevron Research Co.
Wax in corrugated board improves box performance ... Nov. 111

Castro, Sam F., Imperial Iscoa, Inc.
Machine changes make line fit product needs ... Apr. 105

Chamberlain, John, Bissell Inc.
Why do we blow our own bottles? ... Mar. 101

Clark, Roland R., Medical Supply Co.
Time measurement system replaces stop watch studies in setting pay rates ... Oct. 142

Corbett, H. O., National Distillers and Chemical Corp.
Laminate plastic films to form single wall bag ... Nov. 98

Crandall, Jerry L., Lehn and Fink Products Corp.
Coating on bottles ends need for dividers in cases, allows glass-to-glass shipments ... Aug. 92

Curran, T. David, Fibreboard Paper Products Corp.
Test sealed carton barriers quickly and reliably ... Feb. 78

Daly, John J., Jr., Continental Can Co., Inc.
Corrosivity tester . . . a new tool for packaging research ...
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125

Deady, Richard, The Norwich Pharmacal Co.
Simple accelerated test checks exterior lacquers, inks ... Sept. 108

Dooley, Donald D., Borden Chemical Co.
How to upgrade your hot melt performance ... Oct. 157

English, Harrison I., Pendleton Woolen Mills
Mechanized line cuts costs, ends package errors Nov. 104

Fahey, Donald J., U.S. Forest Products Laboratory
Phenolic resin treatment improves fibreboard compressive strength ... Oct. 130

Fahey, John J., Lewis/Howe Co.
Close machining of rolls makes sealers self-cleaning ... May 98

Fellers, David A., Rutgers—The State University, N.J.
"Pair testing" compares how films maintain color of fresh meat ... June 92

Fitzgerald, John M., Lockheed Missiles and Space Co.
Quest for packaging's past traces 5,000 years of history ... June 151

Forsyth, Robert S., National Starch and Chemical Corp.
How to correct your bottle labeling troubles ... Sept. 114

Gentry, William R., California Oil Co.
In-the-case filling, nozzle selectivity make line versatile ... June 96

Gilbert, Seymour, Milprint Inc.
Sharpen your skill at putting liquids in flexible packages ... July 79

Gordon, James B., Sinclair-Koppers Co.
Practical tests, comparisons simplify cushioning selection ... Aug. 74

Gosper, David, Kordite Corp.
New test method calculates yield of printed materials ... Mar. 108

Graham, John J., Jr., Schering Corp.
Large polyethylene bottle pays off in lower packaging costs and less damage ... Apr. 116

Griffin, Roger C., Jr., Reynolds Metals Co.
Geometry helps fix size of fin-sealed pouch ... Feb. 92

Gruber, John R., Preway Inc.
Keeping responsive to needs for package changes Mar. 118

Build line around people, place machines to fit their jobs ... July 73

Hillner, Joseph J., Fibreboard Paper Products Corp.
Mechanized line cuts costs, ends package errors Nov. 104

Hottinger, Ray, J. C. Penney Co., Inc.
Specifications, tests cut shipping damage ... June 102

Johnson, Bruce K., General Foods Corp.
Reduce case flap size without boosting damage level ... Dec. 65

Jordan, Clarence A., U.S. Forest Products Laboratory
New tests probe cushioning properties of corrugated board ... Dec. 76

Kilsheimer, Joseph E., Rexall Drug Co.
How can we check up on aerosol container quality? ... June 79

Koning, John W., Jr., U.S. Forest Products Laboratory
Phenolic resin treatment improves fibreboard compressive strength ... Oct. 130

Landkamer, James C., 3M Co.
New test measures how well film pouches retain vacuum ... Apr. 96

Lisicky, Joseph, The Glidden Co.
Trouble-free pouch line stems from careful planning, installation, maintenance ... Aug. 69

Logue, E. Eugene, Amway Corp.
Hydrocarbon propellants need safe handling ... Dec. 59

McAlarney, John C., Bloch Brothers Tobacco Co.
Rearrange line, change overwrap to boost production, cut costs ... Dec. 69

McMahon, James, The Glidden Co.
Trouble-free pouch line stems from careful planning, installation, maintenance ... Aug. 69

Mayhew, Myron A., National Distillers and Chemical Corp.
Laminate plastic films to form single-wall bag ... Nov. 98

Nash, J. H., International Business Machines Corp.
Packaging tests point the way to product design improvement ... July 86

Niemann, Lawrence, Milnot Co.
Switch in caser cuts board use ... Aug. 80

Oniga, John, National Screw and Manufacturing Co.
Engineering, cost studies give factual basis for packaging improvement program ... Sept. 103

Package Engineering Staff:
A day with Charles W. Lincoln ... Nov. 138
A day with David P. Darling ... Dec. 95
A day with Robert B. Etter ... Oct. 170
Accuracy in filling heavy bags cuts down product giveaway ... Jan. 116
AMA conference program ... Mar. 130
AMA packaging show "firsts" ... Mar. 144
Armour blends decentralized packaging, centralized direction ... Jan. 65
Barrier package protects space unit ... Oct. 221
Bridges, bands suspend product in box ... Oct. 221
Can transistors run your packaging machinery? Nov. 89

YOU MAY HAVE AN EXTRA COPY OF OUR CUMULATIVE EDITORIAL INDEX FOR 1965

Just write us on your company letterhead and we will send you a single reprint as long as our supply lasts. Write:

Reader Service Dept.

Chicago, Illinois 60606

Colleges and universities offer courses in packaging ... Sept. 143
Cushioning fits new item into existing box ... Oct. 220
Drawcord makes bag reclosable ... Oct. 220
Exhibitors—AMA 34th National Packaging Exposition, Apr. 5-8, 1965 ... Mar. 151
Groups announce courses in packaging ... Oct. 245
High-speed line puts nonreturnable bottles in fully enclosed carriers ... Oct. 123
How do you manage packaging research? ... Sept. 126
IEEE packaging subcommittee to hold 5th Annual technical conference ... Apr. 144
Inline printing slashes case inventory ... Oct. 221
Mechanize the bagging of round breads ... May 81
Michigan State's packaging program needs support, seeks industry help ... Oct. 185
National contracts aid volume buying of shipping containers ... Jan. 83
National group proposes model state regulation on quantity statements ... July 144
Nylon strapping contracts as package settles ... Oct. 220
Packaging Institute's 27th annual national packaging forum ... Sept. 139
Packaging machinery show—1965, classified directory ... Oct. 195
PMMI show guide and seminar program ... Oct. 189
PMMI show reflects user needs ... Dec. 100
Research, development team taps talents of entire company ... Jan. 68
Schools can train mechanics, educator tells PMMI seminar ... Dec. 121
Snap-apart opening, reclosure tape aid bag ... Oct. 221
Specifications reflect product needs, fit supplier capability ... Jan. 74
SPHE holds annual seminar and competition ... Dec. 153
SPHE urges council of packaging groups ... June 160
Stapling of top flaps ends case closing bottleneck ... Mar. 138
Step-by-step methods check incoming, outgoing can quality ... Jan 90
Stout State University to offer packaging courses Aug. 148
Strict controls prevent errors in production line labeling ... Jan. 102
Switch to extensible kraft bag cuts breakage ... July 108

Weights and measures conference approves state packaging regulations ... Aug. 120
What was new at Chicago? (AMA National Packaging Exposition) ... May 114
Wisconsin speakers tell how to improve package development, line operations ... Apr. 134
Witnesses dispute need for Hart Bill ... July 34

Payne, John H., The Stanley Works
Automation puts small parts in header label pouches ... June 112

Price, Charles E., General Foods Corp.
Control of folding carton scorebend, opening force cuts spoilage, hikes efficiency on packaging lines ... May 100

Riese, George, G. Heileman Brewing Co., Inc.
Faster labeling, extra input boost bottling line production ... Feb. 86

Rollins, Edmund J., Taterstate Frozen Foods
New equipment improves line speed, filling accuracy ... Mar. 122

Sacharow, Stanley, Standard Packaging Corp.
Using electronic instruments for packaging materials analysis ... July 91

Srigley, Leland R., Consultant
Leader's enthusiasm wins support, quells fears about automation's coming ... May 77

Stern, Robert K., U.S. Forest Products Laboratory
New tests probe cushioning properties of corrugated board ... Dec. 76

Streeb, Mel, International Register Co.
Simplify, standardize package components to cut costs, slash inventories ... Apr. 100

Sueter, Robert E., The Mennen Co.
Effective line mechanization rests on thorough planning, careful follow-through ... Mar. 112

Thomas, Ralph H., Bristol-Myers Co.
Step-by-step planning, careful choices of materials, and methods lead to effective single-use packets ... May 85

Ullman, F. E., Inland Steel Container Co.
Development of lightweight drum ... Aug. 104

Van Leer, R. Karl, W. R. Grace and Co.
Saran emulsion coatings give packages barrier properties ... Mar. 130

Wheeler, Gordon C., Fibreboard Paper Products Corp.
Test sealed carton barriers quickly and reliably ... Feb. 78

Wogan-Browne, S. C., Kent Brewery
Switch to wrap-around cases brings savings, keeps pace with high-speed can line ... June 88

Wolf, Murray, Tri-Wall Containers, Inc.
Top-to-bottom compression strength of corrugated containers ... Apr. 121

Zelnick, Seymour, Weldotron Corp.
Effective shrink packaging rests on skillful engineering, correct choices of equipment ... Aug. 83

EDITORIALS

A note from the publisher, by Angus J. Ray:
Packaging at Armour and Company ... Jan. 4
Where does packaging belong? ... Feb. 4
Don't miss the packaging show ... Mar. 4
What is an editor? ... Apr. 4
Problems of high-speed machinery ... May 4
Does your company recognize the professional packaging man? ... June 4
Some thoughts on packaging legislation ... July 4
Where do you do your business reading? ... Aug. 4
The packaging Institute ... Sept. 4
We'll see you at the Packaging Machinery Show ... Oct. 4
Do electronic control devices bother you? ... Nov. 4
PMMI will launch drive: teach maintenance in vocational schools ... Dec. 4

As I see it, by R. Bruce Holmgren
Can you relate your job to your company's goals ... Jan. 156
Human development won't work without job enlargement ... Feb. 152
Action, not hesitation, makes "no compromise" choice work ... Mar. 220
Get ideas, opinions from line crews, then act on them ... Apr. 178
College teaching won't improve without your help ... May 170
Plan for United Council deserves our support now ... June 164
User companies do not do enough packaging research ... July 150
Are you making the most of new management methods? ... Aug. 150
Show management you need "new package" money early ... Sept. 178
Michigan State's program needs your help now ... Oct. 250
Would you put your head on the block for your job? ... Nov. 174
Today's big problems need packaging man's unique talent ... Dec. 176

SUBJECTS

Additives
Micron-sized silica gel, anti-blocking agent for polyethylene ... Dec. 136

Adhesive Applicating Systems
Applies hot melts in register, patterns ... Feb. 118
Close machining of rolls makes sealers self-cleaning, by John J. Fahey ... May 98
Delivers hot melt quickly ... July 122
Gun sprays wide glue band on case ... May 137
Hot-melt applicator is compact ... Sept. 158
Hot-melt gun is automatic airless spray unit ... Jan. 139
Keeps adhesive temperature constant ... Sept. 162
Melts adhesive with hot air ... Aug. 123
See also: Packaging operation/techniques; Sealing; Sealing equipment

Adhesives and Adhesion
Adheres to films, dries transparent ... Oct. 226
Adhesive bonds films for boil-in-bag pouches ... Nov. 158
Adhesive coating for films resists ultraviolet light ... Feb. 119
Adhesive seals clay-coated board ... Nov. 156
Adhesives are for folding cartons, cases ... Oct. 230
Bonding film comes in rolls, sheets ... Sept. 159
Carton adhesive runs at high speed ... June 141
How to upgrade your hot melt performance by Donald D. Dooley ... Oct. 157
Label adhesive for adhering paper labels to polyethylene, metal, and all nonporous surfaces ... Jan. 143
Modified vinyl resin for labeling PVC bottles ... Dec. 135
New adhesive for blister packaging ... Oct. 224
Paper adhesive resists heat, water ... July 120
PVA emulsion suitable for porous paper and high-speed machinery ... Jan. 131
Resin increases adhesion, flexibility ... Sept. 156
Starch adhesive for gummed tape ... June 132
See also: Packaging operation/techniques; Sealing

Aerosol Packaging
Aerosol filler charges two ways ... Aug. 139
Aerosol line is explosion-proof, uses hydrocarbon as propellant ... Aug. 122
Explosion-proof aerosol line operates by air ... Sept. 151
How can we check up on aerosol container quality? by Joseph E. Kilsheimer ... June 79
Hydrocarbon propellants need safe handling, by E. Eugene Logue ... Dec. 59

(Turn Page)

Multi-head gas pressure checking unit ..... Aug. 128

Aerosols
Aerosol cap has tamper-proof seal ..... Aug. 125
Aerosol dome blends with can ..... Nov. 152
Aerosol valve adjusts rate of spray ..... Sept. 154
Container generates own pressure power to discharge heavy liquids ..... July 111
Offer new line of aerosol cans ..... July 129

Aerospace Packaging
Barrier package protects space unit ..... Oct. 221
Keeping product protection without losing structural values of container, by Joe Haller ..... May 93

Agricultural Chemical Packaging
Accuracy in filling heavy bags cuts down product giveaway ..... Jan. 116

Automation
Leader's enthusiasm wins support, quells fears about automation's coming, by Leland R. Srigley ..... May 77
See also: Packaging operations/techniques

Bag Making Equipment
Forms polyethylene bags, applies header labels Nov. 148
Makes film bags in tear-off rolls ..... Apr. 159

Bagging Equipment
Bags product by count ..... Aug. 131
Loads plastic bags automatically ..... May 151
Mechanize the bagging of round breads ..... May 81
Packages free-flowing products ..... June 138

Bags, Laminated
Laminated bags resist moisture, use range of films ..... Sept. 150

Bags, Mesh
Bag has cross ventilation ..... May 144

Bags, Multiwall
Accuracy in filling heavy bags cuts down giveaway ..... Jan. 116
Multiwall bag has film ply ..... June 142
Switch to extensible kraft bag cuts breakage ... July 108

Bags, Paper
Uses gussets on corrugated envelope ..... July 124

Bags, Plastic
Drawcord makes bag reclosable ..... Oct. 220
Film bags protect sterile items ..... May 144
Laminate plastic films to form single-wall bag, by M. A. Mayhew and H. O. Corbett ..... Nov. 98
Mechanized line cuts costs, ends package errors, by H. I. English and J. J. Hillner ..... Nov. 104
Plastic bag uses header ..... Jan. 124
Polyethylene bags have built-in headers ..... Oct. 225
Polyethylene bags in extra wide and long sizes .. Jan. 133
Snap-apart opening, reclosure tape aid bag .... Oct. 221

Bags, Shipping
Cushioned bag is lightweight ..... Oct. 229
See also: Form-fill-seal; Packaging operations/techniques

Baked Goods Packaging
Mechanize the bagging of round breads ..... May 81

Beverage Packaging
Corrosivity tester . . . a new tool for packaging research, by John J. Daly, Jr.
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125
Faster labeling, extra input boost bottling line production, by George G. Riese ..... Feb. 86
High-speed line puts nonreturnable bottles in fully enclosed carriers ..... Oct. 123
Switch to wrap-around cases brings savings, keeps pace with high-speed can line, by S. C. Wogan-Browne ..... June 88

Blister Packaging
Blister sealer fits turntable operation ..... Nov. 152
Controls drape of skin packages ..... July 132
Low cost blister packaging machines combine manual /automatic operations ..... Dec. 140
Sealer die does not contact material ..... June 129
See also: Shrink packaging; Skin packaging

Board, corrugated
New tests probe cushioning properties of corrugated board, by C. A. Jordan and R. K. Stern Dec. 59

Book Reviews
Adhesive Materials, by Irving Katz, Long Beach, Calif.: Foster Publishing Company, 1964 .... June 38
Handbook of Foamed Plastics, edited by Rene J. Bender. Libertyville, Ill.: Lake Publishing Company, 1965. ..... Oct. 224
Package Printing, by Robert P. Long. Garden City, N.Y.: Graphic Magazines, Inc., 1964. .. June 38

Bottles, Glass
Coating on bottles ends need for dividers in cases, allows glass-to-glass shipments, by Jerry L. Crandall ..... Aug. 92
High-speed line puts nonreturnable bottles in fully enclosed carriers ..... Oct. 123

Bottles, Plastic
Effective line mechanization rests on thorough planning, careful follow-through, by Robert E. Sueter ..... Mar. 112
Large polyethylene bottle pays off in lower packaging costs and less damage, by John J. Graham, Jr. ..... Apr. 116
Milk bottle runs on existing units ..... July 121
Polyethylene bottles have range of capacities .. Feb. 132
Polymer makes plastic bottles transparent, resistant to oils, and shatterproof ..... June 121
PVC bottles are transparent ..... June 120
Specifications reflect product needs, fit supplier capability ..... Jan. 74
Why do we blow our own bottles? by John Chamberlain ..... Mar. 101
See also: Packaging operations/techniques

Box-Making Equipment
Makes boxes to desired sizes, types ..... Oct. 234

Boxboard
Boxboard has high gloss ..... June 130

Boxes
Boxes resist moisture, hold frozen fruit, release it without sticking ..... Apr. 148
Engineering, cost studies give factual basis for packaging improvement program, by John Oniga ..... Sept. 103
Makes corrugated boxes from sheets ..... Mar. 198
National contracts aid volume buying of shipping containers ..... Jan. 83
New ice-pack corrugated box has unusual strength ..... Dec. 133
Reduce case flap size without boosting damage level, by Bruce K. Johnson ..... Dec. 65
Simplify, standardize package components to cut costs, slash inventories, by Mel Streeb ... Apr. 100
Tear strips open corrugated box ..... Apr. 152
Top-to-bottom compression strength of corrugated containers, by Murray Wolf ..... Apr. 121
Wax in corrugated board improves box performance, by J. G. Carroll ..... Nov. 111
See also: Adhesives and adhesion; Cartons; Cases; Packaging operations/techniques; Sealing

Brewery Packaging—See Beverage Packaging

Bundling Equipment
Medium-range bundling machine adaptable to wide range of sizes ..... Dec. 139
Transparent bundling speeds package handling Nov. 147

Cams
Oscillating cam unit ..... Jan. 133

Can Making Equipment
Molds thin wall containers ..... May 139

Canning—See Food Packaging

Cans, Fibre

Easy-open container features narrow plastic tape wrapped around one end ... Dec. 134

Cans, Metal

Pull-tape cans are for viscous products ... Nov. 157

Step-by-step methods check incoming, outgoing can quality ... Jan. 90

See also: Aerosols

Capping Equipment

Caps odd-sized bottles ... Oct. 233

High-speed unit runs range of caps ... Mar. 188

Tightens plastic bottle caps ... Aug. 141

Cartoning Equipment

Adjusts quickly to carton size ... Aug. 142

Carton protects vacuum pouches of meat ... Sept. 151

Cartons aluminum beer cans ... Nov. 158

Closes, seals top-loading cartons ... Nov. 151

Forms cartons from blanks in choice of styles at high speed ... July 111

Forms, closes hood-style cartons ... June 125

Opens, closes, seals cartons ... Nov. 155

Puts leaflets, articles in cartons ... Apr. 157

Runs wide range of cartons ... Jan. 125

System puts ice cream in zip-open cartons ... Jan. 125

See also: Packaging operations/techniques

Cartons

Add barrier, gloss to carton ... June 124

"Air-Vent" folding carton permits 100 per cent air circulation around product ... Dec. 131

Carton has coating on two sides ... Aug. 131

Carton has polyethylene coating ... July 113

Carton posts protect eggs ... Aug. 140

False bottom makes carton into dispenser ... Nov. 147

Metal snap makes carton reusable ... Nov. 146

New equipment improves line speed, filling accuracy, by Edmund J. Rollins ... Mar. 122

Pulp egg carton has film overwrap ... Mar. 173

Strict controls prevent errors in production line labeling ... Jan. 102

Test sealed carton barriers quickly and reliably, by David T. Curran and Gordon C. Wheeler Feb. 78

Time measurement system replaces stop watch studies in setting pay rates, by Roland R. Clark ... Oct. 142

See also: Adhesives and adhesion; Packaging operations/techniques

Case Forming Equipment

Sets up variety of case types ... Nov. 150

Case Sealing

Case sealer features glue valves exposed for cleaning and accessibility ... Dec. 131

Close machining of rolls makes sealers self-cleaning, by John J. Fahey ... May 98

See also: Adhesives and adhesion; Packaging operations/techniques

Cases, Plastic

Polypropylene case holds milk cartons ... Sept. 153

Casing

Stapling of top flaps ends case closing bottleneck Mar. 138

Switch to wrap-around cases brings savings, keeps pace with high-speed can line, by S. C. Wogan-Browne ... June 88

See also: Packaging operations/techniques

Casing Equipment

Automatic case flap opener works with packer or uncaser, can run on slant ... Mar. 172

Case packer features new lifting mechanism ... Jan. 142

Case packer handles glass or metal containers or folding cartons ... Jan. 130

Forms case around cans ... May 138

Forms case around product ... May 136

Imprints and seals cases automatically ... Sept. 156

Loads cans into end-opening case in one- or two-tier pattern ... May 135

Positions cans, then wraps corrugated blank around them, forms end-opening case ... Apr. 148

Seals, lifts wide range of cases ... May 134

Slits, positions case flaps ... May 153

Switch in caser cuts board use, by Lawrence Niemann ... Aug. 80

See also: Packaging operations/techniques

Cereal Packaging

Control of folding carton scorebend, opening force cuts spoilage, hikes efficiency on packaging lines, by Charles E. Price ... May 100

Checkweighing

Air cylinder mechanism rejects off-weight packages ... Dec. 146

Checks by average, not random, weight ... Apr. 151

Checkweigher features mechanical rejection and simplified electronic system ... Jan. 140

Checkweigher features optical tower that projects readings ... Jan. 136

Checkweigher uses flexure pivots ... June 121

Checkweighs at high speed ... July 113

Checkweighs in-line at high speeds ... June 141

Checkweighs large, heavy cases ... May 152

Checkweighs pouches on packaging machines ... Nov. 157

New Equipment improves line speed, filling accuracy, by Edmund J. Rollins ... Mar. 122

Pattern of lights shows checkweighing ... June 121

Unit checkweighs ice cream cartons ... Oct. 233

Unit corrects, adjusts weights ... May 152

Weighers have choice of controls ... Mar. 186

See also: Packaging operations/techniques; Weight control equipment

Clips, Wire

Holds case flaps open during packing ... Oct. 234

Closing Equipment

Automatic bag closing machines ... Jan. 128

Bench closer runs metal tubes ... Mar. 199

Extended can end feeder delivers ends around obstacles ... Dec. 130

Portable electric unit twist ties bags ... May 142

Semi-automatic machine closes plastic bags ... Feb. 128

Vacuumizes, seals pear-shaped cans ... Feb. 130

Closures

Aerosol cap has tamper-proof seal ... Aug. 125

Cap has built-in combination lock, prevents tampering ... May 135

Cap locks to prevent tampering by children, has key attached ... Aug. 123

Cap seal without inner seal ... Nov. 146

Flexible closure makes tight seal ... Nov. 149

Innerseal adheres under cap pressure ... June 121

Paperboard closures fit plastic containers ... Oct. 222

Polypropylene closure holds torque under heat Mar. 186

Pre-threaded tamperproof aluminum closure ... Dec. 131

Six new plastic caps are available ... Aug. 137

Clutches

Clutch gives constant torque ... June 142

Custom clutch for high speeds ... Aug. 135

Electric clutch fits variety of jobs ... Aug. 143

Electric clutches, brakes for engaging or disengaging a shaft ... Jan. 131

Coating Equipment

Curtain coater's head drains, needs no heat ... Feb. 135

Nip fed reverse roll coater handles low viscosity coatings ... Jan. 128

Short run unit coats flexible materials ... Oct. 231

Coatings

Coating on bottles ends need for dividers in cases, allows glass-to-glass shipments, by Jerry L. Crandall ... Aug. 92

Coating protects against grease, oil ... July 113

Covers printing, allows remarking ... June 126

Hot-melt coating for folding cartons provides vapor barrier ... Apr. 167

Plastic coating resists chemicals ... June 135

(Turn Page)

Polypropylene coats on paper ... Apr. 165
Saran emulsion coatings give packages barrier properties, by R. Karl Van Leer ... Mar. 130
Saran latex coating adds strength, barrier to corrugated boxes ... Feb. 124
Simple accelerated test checks exterior lacquers, inks, by Richard Deady ... Sept. 108

Coding Equipment
Codes cans, jars on bottoms ... May 149
Codes cans on line at high speeds ... Sept. 165
Codes film bag during heat sealing ... Aug. 134
Codes, tags multiwall bags ... May 148
Imprints codes on multiwall bags ... Sept. 163
Mobility added to printer attachment for random bottom coding ... Dec. 146
Top coder runs on high-speed line ... July 129
See also: Printing equipment

Color
"Pair testing" compares how films maintain color of fresh meat, by David A. Fellers ... June 92

Composite Cans—See Cans, Fibre

Compression Units
Compresses case flaps during sealing ... Nov. 156

Containers, Foil
Foil container features depth ... May 142
Pie plate rim protects crust ... June 132
Rigid aluminum foil container has 10-lb. capacity ... Jan. 125
Rigid foil plate for frozen foods and baked goods Dec. 139

Containers, Glass
Fresh challenges for packaging director, by Alan Berger ... Sept. 91

Containers, Metal
Metal bottles come in stock sizes ... Apr. 166
Pail has inner compartment ... June 126
Slip cover cans have clear windows ... Apr. 166
Steel pails have dipping baskets ... Aug. 138
Steel pails stack and roll ... Apr. 160
Two-gallon nesting pail has graduation marks ... Jan. 143

Containers, Plastic
Barrel-shaped polystyrene vending cup ... Jan. 140
Plastic containers come in five sizes ... May 147
Polyethylene drums hold hazardous chemicals ... Oct. 232
Resists damage from heat, cold ... Apr. 153
Ribs give plastic container rigidity ... Nov. 149
Rolled edge aids tight closure fit ... Apr. 148
Tablet box has hinge, snap closure ... Nov. 146
See also: Aerosols; Bags; Bottles; Boxes; Cans; Cartons; Cases; Drums; Pouches; Trays; Tubes; Packaging operations/techniques

Contour Packaging
Get contour pack without preforming ... Mar. 193
See also: Blister packaging; Shrink packaging

Controls
Automatically feeds solvent supply ... July 130
Can transistors run your packaging machinery? Nov. 89
Control system for wrappers ... Jan. 130
Detects hidden splices in webs ... June 134
Detector, counter cuts web waste ... Feb. 132
Do electronic control devices bother you? by Angus J. Ray ... Nov. 4
Photoelectric edge guide control system works at high speed ... Feb. 137
Provides programmed machine control ... Oct. 224
Solid state unit meters variabilities ... May 137
Spots malfunction, stops machinery ... May 153
Timing controls guide can imprinting ... Mar. 191
Unit detects abnormal flow ... Aug. 141
Unit indicates color differences ... July 116
See also: Packaging operations/techniques Recorders; Tests and testing

Conveying Equipment
Combines four lines into one ... June 134
Conveyor belt cleats are plastic ... Apr. 161
Conveyor belt operates in cold temperatures ... Oct. 231
Conveyor chain makes turns ... Jan. 124
Conveyor chains have plastic rollers ... May 136
Conveyor features adjustable guide rails which tip in or out at top and bottom ... Dec. 144
Lift feeds case tiers to operator ... Mar. 173
Lowers, raises cases from line ... Nov. 157
Makes horizontal, vertical turns ... May 149
Steel conveyor belt has range of widths ... Feb. 137
See also: Packaging operations/techniques

Corrosion
Blended corrosion inhibitor protects wide range of metals ... Feb. 118
Corrosivity tester . . . a new tool for packaging research, by John J. Daly, Jr. ...
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125

Cosmetics Packaging
Effective line mechanization rests on thorough planning, careful follow-through, by Robert E. Sueter ... Mar. 112
Specifications reflect product needs, fit supplier capability ... Jan. 74
Step-by-step planning, careful choices of materials, and methods lead to effective single-use packets, by Ralph H. Thomas ... May 85

Costs, Packaging
Engineering, cost studies give factual basis for packaging improvement program, by John Oniga ... Sept. 103
Keeping responsive to needs for packaging changes, by John R. Gruber ... Mar. 118
Large polyethylene bottle pays off in lower packaging costs and less damage, by John J. Graham, Jr. ... Apr. 116
Mechanized line cuts costs, ends package errors, by H. I. English and J. J. Hillner ... Nov. 104
Rearrange line, change overwrap to boost production, cut costs, by John C. McAlarney ... Dec. 69
Show management you need "new package" money early, by R. Bruce Holmgren ... Sept. 178
Simplify, standardize package components to cut costs, slash inventories, by Mel Streeb ... Apr. 100
Switch to wrap-around cases brings savings, keeps pace with high-speed can line, by S. C. Wogan-Browne ... June 88
Time measurement system replaces stop watch studies in setting pay rates, by Roland R. Clark ... Oct. 142
See also: Packaging operations/techniques

Counting Equipment
Bags product by count ... Aug. 131
Counts cartons in units ... Aug. 125
Counts large numbers of items ... Aug. 140
Counts, packages small parts ... Mar. 200
Counts, sorts packages by color codings ... Sept. 151
Counts tablets at high speed ... Oct. 235
Need key to reset counter ... May 153
See also: Controls; Packaging operations/techniques

Cradler
Allows one man to load, unload barrels ... Oct. 235

Crates
Use box, crate nails from strips ... Mar. 172

Cushioning
Columns cushion fragile items ... Sept. 154
Cushioning felt has pressure-sensitive back ... Nov. 152
Cushioning fits new item into existing box ... Oct. 220
Cushioning material is free-flowing ... Apr. 157
Cushioning material separates, protects product Jan. 124

Foam sheeting comes in colors ... June 126
New tests probe cushioning properties of corrugated board, by C. A. Jordan and R. K. Stern ... Dec. 76
Polyurethane cushioning has self-stick backing ... Feb. 126
Polyurethane foam has vinyl coating ... Oct. 225
Practical tests, comparisons simplify cushioning selection, by James B. Gordon ... Aug. 74

See also: Packaging operations/techniques

Cutting Equipment
Cuts, punches skin pack sheets ... Feb. 124
Cutter for round corner cards fits wrappers ... Nov. 158
Die cuts paperboard ... May 149
Sheet cutting unit for cellophane or plastic films Jan. 138

Cylinders
Air cylinder has stroke adjustment in piston rod bearing ... Mar. 185
Air cylinders resist rust, corrosion ... Apr. 165
Compact air cylinder has controlled stroke ... Sept. 160

Dairy Products Packaging
Cutting the package aids product use ... Nov. 146
"Pair testing" compares how films maintain color of fresh meat, by David A. Fellers ... June 92

Degreasing equipment
Ultrasonic vapor degreaser has six frequencies ... Mar. 176

Desiccants
Desiccant absorbs moisture in aerosols ... Nov. 159

Detectors
Detects objects with radar beam ... Oct. 225

Detergent Packaging
Corrosivity tester . . . a new tool for packaging research, by John J. Daly, Jr. ...
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125

Dispensers
Puts coupons into packages ... Oct. 237
Dispenses tape in desired lengths ... Oct. 237

Distillery Packaging
Stapling of top flaps ends case closing bottleneck Mar. 138

Drives
Ball/disc drive ... Jan. 129

Drug Packaging—See: Pharmaceutical Packaging

Drums
Development of lightweight drum, by F. E. Ullman ... Aug. 104
Polyethylene drums hold hazardous chemicals ... Oct. 232

Dusting Equipment
Electronic dry-dusting system ... Jan. 133

Engineering—See: Package development/engineering; Packaging line layout; Packaging operations/techniques

Equipment Development—See: Machinery; Packaging line layout; Packaging operations/techniques; Eqiupment indexed by unit operations

Equipment, Laboratory—See Tests and Testing

Equipment Packaging
Keeping product protection without losing structural values of container, by Joe Haller ... May 93

Equipment, Packaging—See: Machinery; Packaging line layout; Packaging operations/techniques; Equipment indexed by unit operations

Europe, Packaging in—See: Notes from Europe in monthly issues of *Package Engineering*

Extruding Equipment
Extruder does laboratory or production runs ... Apr. 156
Film/sheet extruder checks heat, scale build-up Feb. 138

Feeding Equipment
Feeder provides even flow of material ... June 131
Feeds, orients plastic containers ... Sept. 163
New roll stock leaflet feeder allows faster speeds in cartoning ... Dec. 146
Orients, feeds plastic bottles ... Mar. 196

See also: Packaging operations/techniques

Fibreboard
Phenolic resin treatment improves fibreboard compressive strength, by John W. Koning, Jr. and Donald J. Fahey ... Oct. 130

Filling
Accuracy in filling heavy bags cuts down product giveaway ... Jan. 116
In-the-case filling, nozzle selectivity make line versatile, by William R. Gentry ... June 96

See also: Packaging operations/techniques

Filling Equipment
Adjusts to fill variety of bottle sizes ... Aug. 137
Air-operated, bench type filling machine ... Jan. 136
Bench type filler has bottom-fill device ... Nov. 153
Bottom fill mechanism adds efficiency to low cost automatic liquid filling machine ... Dec. 143
Filler puts high acid content liquids into bottles or cans ... Apr. 149
Fills bags with hard-to-handle products ... Nov. 156
Fills containers with liquids automatically ... Oct. 234
Fills four containers at once ... June 130
Fills heavy products ... Aug. 141
Fills ice cream in patterns ... May 147
Fills narrow neck containers ... July 116
Fills plastic bags by weight ... Oct. 227
Fills preformed trays with powders ... May 144
Fills single-wall bags with powders ... June 124
Fills variety of bottle sizes ... July 124
Gravity filler for thin liquids has electronic level controls ... Feb. 122

Films, Cellophane
Cellophane has polymer coating on both sides ... Nov. 150
Cellophane is for push-feed wrappers ... Oct. 223
Cellophane is for wrapping cigars ... Oct. 228
Cellophane withstands cold ... June 130
Film for meat has saran coating ... July 113
New cellophane adaptable to extrusion coating or laminating ... Dec. 136

Films, Plastic
Adds strength to boil-in-pouch ... Apr. 154
Boil-in-bag film is nylon ... Aug. 140
Boost yield of bread wrap film ... Feb. 126
Cast polypropylene film's twist is strong lock ... May 135
Film combines nylon, polyethylene ... June 121
Film has high impact strength ... June 135
Film has high stiffness ... Apr. 156
Film is for vacuum packaging ... June 134
Film seals container liners ... July 130
Films are for bags and overwrapping ... Nov. 159
High-impact polyethylene is opaque ... Oct. 226
Increases heat stability of PVC ... May 148
Laminate plastic films to form single-wall bag, by M. A. Mayhew and H. O. Corbett ... Nov. 98
Meat wrap film has extra stiffness ... Aug. 134
Medium-density polyethylene film ... Jan. 129
Metallized oriented polypropylene ... July 120
New film is for shrink applications ... Oct. 229
Polyester film meets dust-free use ... Feb. 120
Polyethylene bag films have toughness, clarity ... May 135
Polymer coating, orienting aids gas packing ... Feb. 119
Polyolefin film keeps seal under retort ... Mar. 184
Saran emulsion coatings give packages barrier properties, by R. Karl Van Leer ... Mar. 130
Shrink film has high seal strength ... June 128

Fitments
Opening tab has pull ring ... Sept. 150
Ridge in polypropylene pouring spout prevents spillage ... Mar. 174

Flexible Packaging
Sharpen your skill at putting liquids in flexible packages, by Seymour Gilbert ... July 79

See also: Packaging operations/techniques

Folding Cartons
Control of folding carton scorebend, opening force cuts spoilage, hikes efficiency on packaging lines, by Charles E. Price ..... May 100

Folding Equipment
Air operates centerfolder ..... Apr. 164
Centerfolder has brake for hand feeding ..... Feb. 119
Centerfolder runs single-wind films ..... Feb. 136

Food Packaging
Build line around people, place machines to fit their jobs, by Gordon L. Harlander ..... July 73
Corrosivity tester . . . a new tool for packaging research, by John J. Daly, Jr. .....
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125
New equipmen improves line speed, filling accuracy, by Edmund J. Rollins ..... Mar. 122
Step-by-step planning, careful choices of materials, and methods lead to effective single-use packets, by Ralph H. Thomas ..... May 85
Trouble-free pouch line stems from careful planning, installation, maintenance, by James McMahon and Joseph Lisicky ..... Aug. 69

Form-Fill-Seal
Form-fill-seal machine has auger feed ..... July 122
Form-fill-seal unit, cartoner work in tandem .. Jan. 125
Form-fill-seal unit has automatic header labeler Feb. 128
Form-fill-seal unit uses cellophane ..... Aug. 128
New pouch packaging machine for powders, granular products and liquids ..... Dec. 131
New twin tube vertical form-fill-seal pouch packaging machine features independent operation on each side ..... Dec. 136
Produces fin-seal pouches ..... June 138
Runs two products simultaneously ..... Oct. 228
Sharpen your skill at putting liquids in flexible packages, by Seymour Gilbert ..... July 79
Trouble-free pouch line stems from careful planning, installation, maintenance, by James McMahon and Joseph Lisicky ..... Aug. 69
Unit runs light, heavy webs ..... July 111

Gas Transmission—See: Permeability

Gauges
Gauge measures fill in drums, carboys ..... Sept. 153
Gauge measures weight, force ..... Sept. 157
Push-pull gauge has magnetically operated override clutch ..... Feb. 120

Gluing—See Adhesives applicating equipment; Packaging operations/techniques; Sealing

Grommet Tabs
Grommet tabs stick to sheeting ..... Feb. 119

Hardware Packaging
Automation puts small parts in header label pouches, by John H. Payne ..... June 112
Engineering, cost studies give factual basis for packaging improvement program, by John Oniga ..... Sept. 103
Machine changes make line fit product needs, by Sam F. Castro ..... Apr. 105
Use box, crate nails from strips ..... Mar. 172

Heat Sealing—See: Sealing

Heaters
Heaters go on packaging machines ..... July 128
Heaters have new insulation ..... June 135
Keeps adhesive temperature constant ..... Sept. 162

Indexing Devices
Orients tubes for filling, sealing ..... Apr. 149

Indicator, Temperature
Sticker shows highest temperature reached ..... Nov. 157

Industry Literature—See monthly issues of *Package Engineering*

Inks
Inks suitable for food packaging ..... Sept. 159
Offset printing unit, new ink combine to print one-way glass containers in multi-colors .... Oct. 223
Simple accelerated test checks exterior lacquers, inks, by Richard Deady ..... Sept. 108

Inserts
Interlocking inserts adjust for content height ... Feb. 123
Strict controls prevent errors in production line labeling ..... Jan. 102

Inspection—See Packaging operations/techniques; Quality control; Tests and testing

Instruments
Using electronic instruments for packaging materials analysis, by Stanley Sacharow ..... July 91

Labeling
How to correct your bottle labeling troubles, by Robert S. Forsyth ..... Sept. 114
Strict controls prevent errors in production line labeling ..... Jan. 102

Labeling Equipment
Applies labels to round, tapered bottles ..... Oct. 227
Applies wraparound labels to containers ..... Nov. 150
Automatically orients, applies labels to cans .... Jan. 124
Cuts, prints, applies labels ..... Sept. 165
Equipment provides roll-fed automatic labeling Dec. 147
Imprints, applies labels ..... Oct. 236
Labels flat or cylindrical surfaces ..... Sept. 153
Labels plastic mailing containers ..... May 139
New semiautomatic labelers have manual and automatic label and container feeds ..... Dec. 135
Pressure-sensitive label dispenser has automatic rewind, takes up backing ..... Mar. 173
Puts labels on ends of packages ..... Sept. 150
Puts labels on plastic containers ..... Aug. 125

Labels
Label comes in range of sizes ..... Sept. 160
Label parts from backing easily ..... Aug. 125
Pressure-sensitive opaque label re-marks boxes Feb. 123
Strict controls prevent errors in production line labeling ..... Jan. 102

Laboratory Equipment—See Tests and Testing

Legislation
Some thoughts on packaging legislation, by Angus J. Ray ..... July 4
Weights and measures conference approves state packaging regulations ..... Aug. 120
Witnesses dispute need for Hart Bill ..... July 34

Lidding Equipment
Puts lids on plastic cups ..... July 121

Liners
Drum liners stack for storage ..... Mar. 199
Plastic liner inflates in closed-head or tight-head steel drums ..... Aug. 136
Polyethylene inner compartments for metal pails Mar. 188

Literature, Industry—See: monthly issues of *Package Engineering*

Machinery
AMA packaging show "firsts" ..... Mar. 144
Gives machine parts teflon surface ..... Aug. 123
PMMI show guide and seminar program ..... Oct. 189
PMMI show reflects user needs ..... Dec. 100
Problems of high-speed machinery, by Angus J. Ray ..... May 4
Transmission has new design ..... Aug. 136
Shape package to fit product, end packaging line delays, by William J. Adlaf ..... Feb. 106
What was new at Chicago? (AMA National Packaging Exposition) ..... May 114

Where do you do your business reading? by Angus J. Ray ... Aug. 4
Where does packaging belong? by Angus J. Ray Feb. 4
Would you put your head on the block for your job? by R. Bruce Holmgren ... Nov. 174

Packaging History

Quest for packaging's past traces 5,000 years of history, by John M. Fitzgerald ... June 151

Packaging Line Layout

Build line around people, place machines to fit their jobs, by Gordon L. Harlander ... July 73
Effective line mechanization rests on thorough planning, careful follow-through, by Robert E. Sueter ... Mar. 112
Faster labeling, extra input boost bottling line production, by George G. Riese ... Feb. 86
High-speed line puts nonreturnable bottles in fully enclosed carriers ... Oct. 123
Machine changes make line fit product needs, by Sam F. Castro ... Apr. 105
Mechanized line cuts costs, ends package errors, by H. I. English and J. J. Hillner ... Nov. 104
Rearrange line, change overwrap to boost production, cut costs, by John C. McAlarney ... Dec. 69

Packaging Operations/Techniques

Accuracy in filling heavy bags cuts down product giveaway ... Jan. 116
Automation puts small parts in header label pouches, by John H. Payne ... June 112
Build line around people, place machines to fit their jobs, by Gordon L. Harlander ... July 73
Can transistors run your packaging machinery? Nov. 89
Close machining of rolls makes sealers self-cleaning, by John J. Fahey ... May 98
Control of folding carton scorebend, opening force cuts spoilage, hikes efficiency on packaging lines, by Charles E. Price ... May 100
Effective line mechanization rests on thorough planning, careful follow-through, by Robert E. Sueter ... Mar. 112
Effective shrink packaging rests on skillful engineering, correct choices of equipment, by Seymour Zelnick ... Aug. 83
Faster labeling, extra input boost bottling line production, by George G. Riese ... Feb. 86

High-speed line puts nonreturnable bottles in fully enclosed carriers ... Oct. 123
How can we check up on aerosol container quality? by Joseph E. Kilsheimer ... June 79
How to correct your bottle labeling troubles, by Robert S. Forsyth ... Sept. 114
How to upgrade your hot melt performance by Donald D. Dooley ... Oct. 157
Hydrocarbon propellants need safe handling, by E. Eugene Logue ... Dec. 59
In-the-case filling, nozzle selectivity make line versatile, by William R. Gentry ... June 96
Keeping product protection without losing structural values of container, by Joe Haller ... May 93
Keeping responsive to needs for package changes, by John R. Gruber ... Mar. 118
Large polyethylene bottle pays off in lower packaging costs and less damage, by John J. Graham, Jr. ... Apr. 116
Leader's enthusiasm wins support, quells fears about automation's coming by Leland R. Srigley ... May 77
Machine changes make line fit product needs, by Sam F. Castro ... Apr. 105
Mechanized line cuts costs, ends package errors, by H. I. English and J. J. Hillner ... Nov. 104
Mechanize the bagging of round breads ... May 81
National contracts aid volume buying of shipping containers ... Jan. 83
New equipment improves line speed, filling accuracy, by Edmund J. Rollins ... Mar. 122
Package display stand assembling takes careful planning and scheduling, by Walter R. Aust Feb. 71
Problems of high-speed machinery, by Angus J. Ray ... May 4
Rearrange line, change overwrap to boost production, cut costs, by John C. McAlarney ... Dec. 69
Research, development team taps talents of entire company ... Jan. 68
Revamp line to run dispensing plugs instead of caps, by Glenn C. Hanson ... Apr. 91
Shape package to fit product, end packaging line delays, by William J. Adlaf ... Feb. 106
Sharpen your skill at putting liquids in flexible packages, by Seymour Gilbert ... July 79
Specifications reflect product needs, fit supplier capability ... Jan. 74
Specifications, tests cut shipping damage, by Ray Hottinger and Kurt Bence ... June 102
Stapling of top flaps ends case closing bottleneck Mar. 138
Step-by-step methods check incoming, outgoing can quality ... Jan. 90
Step-by-step planning, careful choices of materials, and methods lead to effective single-use packets, by Ralph H. Thomas ... May 85
Strict controls prevent errors in production line labeling ... Jan. 102
Switch in caser cuts board use, by Lawrence Niemann ... Aug. 80
Switch to wrap-around cases brings savings, keeps pace with high-speed can line, by S. C. Wogan-Browne ... June 88
Time measurement system replaces stop watch studies in setting pay rates, by Roland R. Clark ... Oct. 142
Trouble-free pouch line stems from careful planning, installation, maintenance, by James McMahon and Joseph Lisicky ... Aug. 69
Wisconsin speakers tell how to improve package development, line operations ... Apr. 134
Why do we blow our own bottles? by John Chamberlain ... Mar. 101

Packaging Systems

Can transistors run your packaging machinery? Nov. 89
Do electronic control devices bother you? by Angus J. Ray ... Nov. 4
Fills, seals plastic vials ... June 134
Fills, seals tubes for liquids, pastes ... Apr. 162
Flat packer automatically counts, orients and fills flat packages ... Feb. 135
Forms, fills, and closes liquid bag-in-box containers ... June 120
Machine changes make line fit product needs, by Sam. F. Castro ... Apr. 105
Machine vacuum-packs bacon at speeds up to 50 packages/min. ... Dec. 146
Make carton of skin package ... July 117
New equipment improves line speed, filling accuracy, by Edmund J. Rollins ... Mar. 122
Packages items in plastic netting ... Oct. 223
Plastic curtain hardens around product, vacuum makes it conform tightly ... May 134
Puts two bread loaves in one bag ... May 147
Shrink film gun is portable ... Oct. 230
Speeds bagging, cuts down dust ... Nov. 147

See also: Equipment indexed by unit operations

Pails—See Containers

Palletizing Equipment

Palletizes cases at end of packaging line ... Oct. 230

Paper

Breadwrap paper has polyethylene coating ... Sept. 152
Label paper has gummed backing ... Nov. 156
Switch to extensible kraft bag cuts breakage ... July 108

Partitioning Equipment

Semiautomatic assembler accommodates wide range of board sizes ... Dec. 134

Permeability

Saran emulsion coatings give packages barrier properties, by R. Karl Van Leer ... Mar. 130
Test sealed carton barriers quickly and reliably, by David T. Curran and Gordon C. Wheeler Feb. 78

Personnel

Do electronic control devices bother you? by Angus J. Ray ... Nov. 4
Get ideas, opinions from line crews, then act on them, by R. Bruce Holmgren ... Apr. 178
Human development won't work without job enlargement, by R. Bruce Holmgren ... Feb. 152
Standardized tests match workers' skills to job demands, by Douglas L. Bartley ... Dec. 73
What is an editor? by Angus J. Ray ... Apr. 4

See also: Management; Packaging function/organization

Petroleum Packaging

Corrosivity tester . . . a new tool for packaging research, by John J. Daly, Jr. ...
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125
In-the-case filling, nozzle selectivity make line versatile, by William R. Gentry ... June 96

Pharmaceutical Packaging

Controls contamination on ampule filling machine ... Nov. 149
How can we check up on aerosol container quality? by Joseph E. Kilsheimer ... June 79
Package display stand assembling takes careful planning and scheduling, by Walter R. Aust ... Feb. 71
Puts pouches in folders ... Mar. 179
Revamp line to run dispensing plugs instead of caps, by Glenn C. Hanson ... Apr. 91
Simple accelerated test checks exterior lacquers, inks, by Richard Deady ... Sept. 108
Step-by-step planning, careful choices of materials, and methods lead to effective single-use packets, by Ralph H. Thomas ... May 85
Strict controls prevent errors in production line labeling ... Jan. 102
Tablet box has hinge, snap closure ... Nov. 146

(Turn Page)

Plastics
Polystyrene now in metallic colors ... Aug. 132
Research, development team taps talents of entire company ... Jan. 68
Sheet has less toughness, less impact resistance than its companion sheet ... Mar. 173

See also: Films, plastic; Packaging operations/techniques

Plugging Equipment
Inserts plugs in containers ... Apr. 165
Puts friction plugs in containers ... Sept. 159

Pouch packaging
Automation puts small parts in header label pouches, by John H. Payne ... June 112
New test measures how well film pouches retain vacuum, by James C. Landkamer ... Apr. 96
Pouch packager uses hot melts ... June 135
Pouch unit makes four seals ... Aug. 132
Puts powders in pouches automatically ... July 111
Step-by-step planning, careful choices of materials, and methods lead to effective single-use packets, by Ralph H. Thomas ... May 85
Trouble-free pouch line stems from careful planning, installation, maintenance, by James McMahon and Joseph Lisicky ... Aug. 69

Pouches
Geometry helps fix size of fin-sealed pouch, by Roger C. Griffin, Jr. ... Feb. 92

See also: Form-Fill-Seal; Packaging operations/techniques

Pressure Packaging—See Aerosols

Printing Equipment
Adds width to imprinter ... Apr. 163
Automatic coder, marker and imprinter takes three ink methods ... Mar. 182
Automatic rotary can and cylinder printer ... Dec. 137
Automatically imprints heavy materials ... Apr. 163
Flexographic imprinter for small plastic boxes ... Feb. 134
Flexographic printer for small cartons ... Jan. 134
Flexographic printing press prints three colors on web ... July 128
Imprinter attaches to vacuum packager ... Nov. 148
Imprinter fits form-fill-seal unit ... Apr. 165
Imprinter goes on tape dispenser ... Aug. 142
Imprinter marks in three colors ... Sept. 162
Imprints and automatically opens and seals polyethylene bags ... Jan. 139
Imprints and seals cases automatically ... Sept. 156
Imprints board and restacks it ... Aug. 132
Imprints bottoms of containers at high speeds ... Oct. 222
Imprints data on cylinders ... Nov. 150
Imprints film on form-fill-seal units ... Sept. 161
Imprints flat bags, case blanks ... May 140
Imprints flat cartons, lids ... Aug. 139
Imprints labels in two colors ... Aug. 128
Imprints paper, plastic bags ... June 129
Inline printing slashes case inventory ... Oct. 221
Line imprinter has own motor ... Aug. 135
Manual imprinter with separate printing heads ... Jan. 136
Manually imprints flat surfaces ... Sept. 165
Marks porous, nonporous surfaces ... Sept. 164
Multi-color rotary printing and die-cutting machine for pressure-sensitive labels ... Apr. 160
Offset printing unit, new ink combine to print one-way glass containers in multi-colors ... Oct. 223
Printer attaches to tape dispensers ... Feb. 139
Printer prints both sides of a capsule or tablet simultaneously ... Jan. 141
Prints containers, webs on conveyor ... Nov. 151
Prints measurable data ... Aug. 136
Prints multiwall bags, box blanks ... Apr. 153
Prints, rewinds rolls of tape automatically ... Oct. 235
Shaft drives imprinter ... July 128
Stencils come in continuous form ... Apr. 153
Table-top label printer uses no ink ... Dec. 135
Tape printer and dispenser offers economical package identification ... Dec. 147
Timing controls guide can imprinting ... Mar. 191

Propellants
Hydrocarbon propellants need safe handling, by E. Eugene Logue ... Dec. 59

Punching Equipment
Punches holes in bags ... Apr. 154

Purchasing
National contracts aid volume buying of shipping containers ... Jan. 83
Research, development team taps talents of entire company ... Jan. 68

See also: Packaging operations/techniques

Quality Control
How can we check up on aerosol container quality? by Joseph E. Kilsheimer ... June 79
National contracts aid volume buying of shipping containers ... Jan. 83
Step-by-step methods check incoming, outgoing can quality ... Jan. 90

See also: Checkweighing; Controls; Packaging operations/techniques

Recorders
Records machine downtime ... July 124
Records time shock takes place ... Sept. 162

Regulations
National group proposes model state regulation on quantity statements ... July 144
Weights and measures conference approves state packaging regulations ... Aug. 120

Research and Development
Armour blends decentralized packaging, centralized direction ... Jan. 65
National contracts aid volume buying of shipping containers ... Jan. 83
Research, development team taps talents of entire company ... Jan. 68
Specifications reflect product needs, fit supplier capability ... Jan. 74
User companies do not do enough packaging research, by R. Bruce Holmgren ... July 150

Resins
Resin is for high-impact film ... Nov. 150

Rolls, spreader
Grooved spreader rolls for paper or plastic processing ... Jan. 130

Sample Packaging
Box, die-cut provide sample kits ... Nov. 147

Sealing Equipment
Air cylinders speed heat sealing ... Mar. 193
Bag sealer takes choice of film ... Mar. 203
Close bags with built-in hot melt ... June 121
Compressed air provides jaw closing force on thermal impulse sealer ... Jan. 126
Gives bags reclosable feature ... Aug. 143
Gives non-stick surface to sealing jaws ... Nov. 158
Gluer unit has no moving parts ... June 128
Hand heat sealer has non-stick wheel ... Mar. 174
Hand heat sealer makes flat seal ... Sept. 165
Heavy duty impulse sealer uses solid state electronic timer principle ... Dec. 144
Inexpensive automatic heat sealer for polyethylene bags ... Dec. 137
Makes film bags in tear-off rolls ... Apr. 159
New automatic conveyorized blister sealer ... Jan. 143
New system of heat-sealing wire replacement simplifies changing of heating elements ... Dec. 147
Portable unit seals two tray sizes ... May 140
Sealer die does not contact material ... June 129

Sealer makes tight, uniform bales ... June 135
Sealer runs range of films ... Apr. 162
Seals blister packages ... July 126
Seals containers with polyethylene covers ... Oct. 229
Seals lids to plastic trays ... June 135
Seals polyethylene bags automatically ... Nov. 154
Semi-automatic heat sealer for plastic containers Mar. 201
Timer regulates dwell time on sealer ... Nov. 151
Tucks or end seals cartons ... Oct. 223
Ultrasonic unit seals containers ... May 150

Shelf Life
Corrosivity tester . . . a new tool for packaging research, by John J. Daly, Jr. ...
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125
New test measures how well film pouches retain vacuum, by James C. Landkamer ... Apr. 96

See also: Tests and Testing

Shock Absorbers
Slows, stops moving loads on line ... May 145

Shrink Packaging
Effective shrink packaging rests on skillful engineering, correct choices of equipment, by Seymour Zelnick ... Aug. 83
Shrink film packager features seals on package sides ... Dec. 143
Shrink film units avoid extra power ... Mar. 203
System (bag plus shrink tunnel) packages bakery goods in foil, plastic, or paperboard trays Jan. 141

Shrink Tunnels
Effective shrink packaging rests on skillful engineering, correct choices of equipment, by Seymour Zelnick ... Aug. 83
High velocity air plus heat control lets shrink tunnel run wide range of films ... Mar. 173
Modular design shrink tunnel has greater versatility ... Jan. 125
Provides equal shrink for odd shapes ... Aug. 143
Shrink tunnel comes in sections ... Apr. 164
Shrink tunnel for shrinking polyethylene film ... Jan. 132
Shrinks film in two stages ... Sept. 155

Size
Fluorochemical paper size treats heavy paper, board ... Feb. 126

Skin Packaging
Controls drape of skin packages ... July 132
Vacuum former is portable ... Mar. 191

Sleeves
Offers visibility, capsule protection ... July 110

Slitting Equipment
Make speed of winding fit needs ... June 129
Slitter-scorer for corrugated board ... Jan. 126
Slitter-rewinder for short runs ... Feb. 136
Tinplate slitter/trimmer ... Jan. 126

Small Parts Packaging
Counts, packages small parts ... Mar. 200
Puts pouches in folders ... Mar. 179

Specifications and Standards
Specifications reflect product needs, fit supplier capability ... Jan. 74
Specifications, tests cut shipping damage, by Ray Hottinger and Kurt Bence ... June 102

Splicing Equipment
Tension device assists web splicing ... Aug. 139

Static Eliminators
Air curtain eliminates static electricity on webs, rolls ... Feb. 126

Standardization
Time measurement system replaces stop watch studies in setting pay rates, by Roland R. Clark ... Oct. 142

See also Packaging operations/techniques

Stapling Equipment
Automatically staples random size cases on top and bottom simultaneously ... July 110
Drives staples into heavy stock ... Apr. 159
Hand stapler equipped with independent staple clinch and depth controls ... Jan. 134
Portable electric stapler ... Jan. 141
Stapler adjusts penetration depth ... Sept. 161
Stapler loads from rear ... May 144
Staples deep cases to skids ... July 126
Stapling machine has simple mechanical trip mechanism on stapling head ... Jan. 142

Strapping
Bi-directional strapping tapes fit irregular items Mar. 182
Nylon strapping contracts as package settles ... Oct. 220
Polypropylene strapping comes in new size ... July 126

Strapping Equipment
Applies nylon strapping ... July 120
Applies, tensions, seals strapping ... Nov. 150
Compression strapping machine interchangeably uses steel or nonmetallic strapping ... Dec. 133
New flat steel strapping cutter has serrated bottom jaw ... Dec. 136
Puts two straps around packages ... Aug. 140
Strapping tool is portable ... Apr. 158
Strapping unit runs automatically ... May 143
Tool tensions, seals, and notches steel strapping July 130
Tool uses non-metallic strapping ... Jan. 139

Strip Packaging
Heat seals tablets into strip packages ... Oct. 225

Suspension Packaging
Bridges, bands suspend product in box ... Oct. 221

Switches
Control features solid state switching ... Dec. 135

Tape
Extra strands boost tape strength ... Apr. 152
Filament tape is self-sticking ... May 136
Foam backed pressure sensitive tape ... Aug. 132
Foam tape absorbs vibration ... Aug. 137
Pre-gummed tape offers choice of tear strengths Aug. 132
Tape comes on tightly wound rolls ... Sept. 155
Tape is for heavy product cases ... Aug. 138
Tape resists abrasion, weather ... Apr. 154
Tapes resist shock, chemicals ... Mar. 184
Tape sticks on both sides ... May 137
Transparent tape has clear adhesive ... June 130

Taping Equipment
Applies tear tape to cellophane ... Oct. 232
Tapes random size cases automatically ... Sept. 163

Tests and Testing
Change chamber cycles automatically ... July 113
Control of folding carton scorebend, opening force cuts spoilage, hikes efficiency on packaging lines, by Charles E. Price ... May 100
Corrosivity tester . . . a new tool for packaging research, by John J. Daly, Jr. ...
Part I Sept. 96
Part II Oct. 179
Part III Nov. 125
Detects faulty heat seals ... July 123
Development of lightweight drum, by F. E. Ullman ... Aug. 104
How can we check up on aerosol container quality? by Joseph E. Kilsheimer ... June 79
Large polyethylene bottle pays off in lower packaging costs and less damage, by John J. Graham, Jr. ... Apr. 116
Multi-head gas pressure checking unit ... Aug. 128
New test measures how well film pouches retain vacuum, by James C. Landkamer ... Apr. 96
New test method calculates yield of printed materials, by David Gosper ... Mar. 108

Package Engineering
2 North Riverside Plaza
Chicago, Illinois 60606

New tests probe cushioning properties of corrugated board, by C. A. Jordan and R. K. Stern — Dec. 76
Packaging tests point the way to product design improvement, by W. V. Allen and J. H. Nash — July 86
"Pair testing" compares how films maintain color of fresh meat, by David A. Fellers — June 92
Phenolic resin treatment improves fibreboard compressive strength, by John W. Koning, Jr. and Donald J. Fahey — Oct. 130
Practical tests, comparisons simplify cushioning selection, by James B. Gordon — Aug. 74
Reduce case flap size without boosting damage level, by Bruce K. Johnson — Dec. 65
Registers shocks packages receive — June 124
Simple accelerated test checks exterior lacquers, inks, by Richard Deady — Sept. 108
Specifications, tests cut shipping damage, by Ray Hottinger and Kurt Bence — June 102
Spots leaks, trim in bottles — Mar. 201
Test sealed carton barriers quickly and reliably, by David T. Curran and Gordon C. Wheeler — Feb. 78
Tester mounts on score bend unit — Aug. 126
Tilting platform tester measures wettability of solid surfaces in contact with liquid — Feb. 123
Top-to-bottom compression strength of corrugated containers by Murray Wolf — Apr. 121
Using electronic instruments for packaging materials analysis, by Stanley Sacharow — July 91
Unit indicates color difference — July 116
Vibration machine simulates typical conditions encountered in shipping — Feb. 130
Wax in corrugated board improves box performance, by J. G. Carroll — Nov. 111

Textile Packaging
Mechanized line cuts costs, ends package errors, by H. I. English and J. J. Hillner — Nov. 104

Thermoforming Equipment
Forms polystyrene cups at high speeds — Oct. 233
Unit has high intensity oven — June 132
Vacuum former has dual timers — Aug. 143

Tobacco Products Packaging
Fresh challenges for packaging director, by Alan Berger — Sept. 91

Trays
Offers visibility, capsule protection — July 110
Polystyrene tray holds fruit — Sept. 151
Three-compartment foil tray has beaded or flanged edge — Feb. 119

Tubes
Clear fluorocarbon tubing makes unit packages — Aug. 122
Corrugated lining cushions paper tube — Sept. 151

Tying Equipment
Applies ties to square bags — June 131
Puts wire closures on plastic bag necks — Sept. 152
Ties ribbon closures on bags — Feb. 134

Uncasing Equipment
Automatic case flap opener works with packer or uncaser, can run on slant — Mar. 172

Unit Packaging
Cutting the package aids product use — Nov. 146
Step-by-step planning, careful choices of materials, and methods lead to effective single-use packets, by Ralph H. Thomas — May 85

Unloading Equipment
Unloader/unscrambler has rubber belts to lift cases off containers — Feb. 119

Unwind Equipment
Unwind stand adjusts for web widths — Oct. 230
Unwind stand handles wide rolls — Aug. 131

Vials
Vials have hinged snap tops — Nov. 151

Vibrators
Vibrates materials in drum, removes by air — Sept. 157
Vibrator moves material in small hoppers — Nov. 158
Vibrators help product flow — May 150

Waste Disposal
Crushes waste, reject containers — May 137

Weighing Equipment
Records weights on cards — Sept. 158
Scales use sliding weight — Mar. 192
Takes shock out of weighing — Mar. 196
Weighs bulky items in motion — Aug. 141
Weighs, fills nuts, grated cheese — Sept. 157
Weight bucket speeds bagging — Mar. 202

Weight Control Equipment
One number shows unit weight — Aug. 125

See also: Checkweighing; Controls; Weighing equipment

Weights and Measures
Weights and measures conference approves state packaging regulations — Aug. 120

Welding Equipment
Automatic ultrasonic system welds irregularly shaped plastic parts — Feb. 124
Spin welds plastic containers — May 147
Ultrasonic unit welds plastics — Sept. 159

Wrapping Equipment
Adjusts for tray height, width — Apr. 149
Rear tuck attachment eliminates need for manual rear tucking — Jan. 132
Wrapping machine features selections of standardized interchangeable attachments — Dec. 130
Wraps fragile baked items with cellophane — Nov. 153
Wraps frozen food cartons in waxed paper — Oct. 229
Wraps large reams of paper — June 135
Wraps napkins in polyethylene — Sept. 159
Wraps range of cheese shapes — May 135

Wraps—See Films; Paper
